***Allowable Subject Matter***

1. Claims 1-13 are allowed in light of the terminal disclaimer and the remark filed on 05/1/2006.

2. The following is an examiner's statement of reasons for allowance:

The prior art fail to teach or fairly suggest a computerized mobile robotic router with an onboard Internet web server, and a capability of establishing a first connection to a remote web browser on the internet for robotic control purposes, and a capability of establishing a second short range bi-directional digital radio connection to one or more nearby computerized digital radio equipped computers or devices external to the robot. The short-range bi-directional digital radio connection will typically have a maximum range of about 300 feet. In a preferred embodiment, this short-range wireless digital connection will use the 2.4 gHz band and digital protocols following the TEEE 802.1 1, 802. 15, or other digital communications protocol. By employing the proper set of external short-range digital radio devices capable of interfacing with the robot (such as sensors, mechanical actuators, appliances, and the like), a remote user on the Internet may direct the robot to move within range of the external devices or computers, and connect these devices or computers to the internet. in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
